

MORNING DROP-OFF

Pull all the way forward. That's the whole trick to a fast drop-off zone.

In the Drop-Off Zone: Pull as far forward as possible before stopping, students exit right away, then ease ahead and exit with caution. **Do not stop in front of the door** — move all the way down.

HOW THE ZONE WORKS

Four moments, in order — the numbers match the map.

1 Zone starts – keep rolling
Once you pass this point, pull your car **as far forward as possible** before stopping. Never stop at the start of the zone.

2 Students exit promptly
The moment your car has stopped, it's go-time — bags ready, doors open, out on the curb side.

3 First car → the very end
The first car in line always pulls **all the way to the end** of the zone, so the whole curb unloads at once.

4 Exit with caution
Leaving the zone you'll pass the Student Lot entrance — a **high-collision area** with teen drivers pulling in. Continue forward slowly.
